Subject Index

actinomycosis of anorectal region, 108
anorectal disorders, painful: surgery in the puerperium, 102
anus, imperforate: genetic considerations, 10
atropine: effect on motor activity of intestine (*by title*), 35

barium enema: in follow up after resection for carcinoma of colon, 48

carcinoma of colon: diagnosis, 36
– – – presenting with acute intestinal obstruction: immediate resection with end-to-end anastomosis, 38
– – –: subtotal colectomy for, 41
– – –: treatment, 36
– – – –, operative (*by title*), 42
– – – –: panel discussion, 43
– – – –: radiodiagnostic aspects (*by title*), 42
chemotherapy, arterial infusion, of liver metastases from rectal and colonic cancer, 21
chromosome abnormalities in polyps and carcinomas of the large bowel, 9
colectomy, subtotal, for carcinoma of colon, 41
– – – – – –: as prophylaxis, 43
colitis, ulcerative and granulomatous: diagnosis and differential diagnosis (*by title*), 145
– –: distribution of serotonin in, 20
– –: the fulminating case, 75
– –: toxic dilatation of colon: exclusion and decompression for, 73
– – with carcinoma of colon, 45
colon devascularization: experimental study (*by title*), 35
–: diverticular disease, motor responses in, 3
–: effects of pharmacologically active peptides *in vitro*, 16
–: influence of vagotomy, 7
–, intact: DNA loss, cell loss and epithelial turnover, 15
– motility, prostaglandins and, 6
–: pressures in, related to diverticular disease, 144
–: toxic dilatation in ulcerative colitis: exclusion and decompression for, 73
colon anastomosis: etiology of leaks, 28
– –: prevention of tumour recurrence: value of mercury perchloride and other agents, 35
colonic diseases: water and electrolyte absorption and secretion (*by title*), 35
colonic neoplasms: carcinoma: diagnosis, 36
– – – – by exfoliative cytology, 45
– – – of splenic flexure: extended resection for, 136
– – – presenting with acute intestinal obstruction: immediate resection with end-to-end anastomosis, 38
– – –: subtotal colectomy for, 41
colonic neoplasms: carcinoma: treatment, 36
– – – –, operative (*by title*), 42
– – – –: panel discussion, 43
– – – –: radiodiagnostic aspects (*by title*), 42
– –: five- and ten-year survival rates after resection (*by title*), 42
– –: surgery: complications and morbidity in left colon resections, 47
– – –, radical: preparation of large bowel, 43
– – –: use of pre- and post-operative tubes, 44, 46
colostomy: panel discussion, 146–155
colotomy or resection for colonic polyps, 128
condylomata acuminata of rectum with associated malignancy, 119
Crohn's disease: *see* enteritis, regional
cytology: cell loss in intact human colon, 15
–, exfoliative: in diagnosis of colonic cancer, 45

defæcation: study using radiopaque markers, 17
diverticular disease, 49
– –, acute: immediate resection, 52
– – –: management (non-surgical), 51
– – and massive hæmorrhage, 55
– –: controversial problems, 57
– – of colon: motor responses, 3
– –: panel discussion (*by title*), 62
– –: pathology, 49
– –: pressures in the colon related to, 144
– –: radiology, 50
– –: results of elective surgery, 61
DNA: loss in intact human colon, 15
drug therapy: for potentially fatal infections in surgical patients, 25
drugs: access to tumours of large intestine, 23

electrolytes: absorption, 1
– – and secretion in colonic diseases (*by title*), 35
–: impermeability of rectum to, 3
enteritis, regional: of colon: diagnostic difficulties, 133
– –: of large bowel, 129
– –: the fulminating case, 75
enterocolitis, ischæmic, in the newborn, 137
enzymes, hydrolytic: histochemical distribution in case of familial polyposis with malignant changes, 34
epithelium: turnover in intact human colon, 15

fissure in ano: pain caused by, 141

gastrointestinal motility: mechanism of colonic peristalsis (*by title*), 35
genetics: considerations in aganglionic megacolon and imperforation, 10

hæmorrhage, massive, and diverticular disease of colon, 55

hæmorrhoidectomy: pain after, 80
hæmorrhoids, internal: ligation, 111
– – –: use of rubber rings, 112
–: prevalence of, 78
–: success of new treatment: views on etiology of perianal conditions, 77

ileitis, post-colectomy: natural history, 68
ileostomy: panel discussion, 146–155
incontinence, anal: principles of surgery, 116
–, rectal: reconstruction of anorectal sphincters, 94
infant, newborn: ischæmic enterocolitis in, 137
infections, potentially fatal, in surgical patients: antibacterial therapy for, 25
inflammatory diseases, 63
– –: nutritional disturbances in (*by title*), 76
– –: pathology, 63
– –: radiological abnormalities – reversibility of, 66
– –: some aspects (*by title*), 76
– –: surgical treatment, 64
intestinal diseases, surgical patients with: antibacterial therapy for potentially fatal infections, 25
intestinal neoplasms: access of drugs to, 23
– –and benign lesions: prevention of pelvic complications in pull-through operations, 121
– –: arterial infusion chemotherapy in liver metastases, 21
– –: carcinomas of large bowel: chromosome abnormalities in, 9
intestinal obstruction, acute: carcinoma of colon presenting with: immediate resection with end-to-end anastomosis, 38
– –, partial: radical surgery – preparation of large bowel, 43
intestinal stoma care: panel discussion, 146–155
intestine: irradiation injury, 98
–: motor activity: effect of neostigmine, atropine and propantheline (*by title*), 35
intestine, large: Crohn's disease, 129
– – – –: diagnostic difficulties, 133

megacolon, aganglionic: genetic considerations, 10
mercury perchloride: prevention of tumour recurrence in colon anastomosis, 35
motor activity of intestine: effects of neostigmine, atropine and propantheline (*by title*), 35
motor responses in diverticular disease of the colon, 3
Moynihan Lecture (*by title*), 42

neoplasm metastasis: in liver, from carcinoma of colon, 46
– – – – –rectal and colonic cancer: arterial infusion chemotherapy, 21
neoplasm recurrence, local: prevention in colon anastomosis: value of mercury perchloride, 35
neostigmine: effect on motor activity of intestine (*by title*), 35
nutrition: disturbances in inflammatory bowel disease (*by title*), 76

pain caused by anal fissure, 141
–, intractable: management in advanced cancer of rectum, 115
–, post-hæmorrhoidectomy, 80
peptides, pharmacologically active: effect on human colon *in vitro*, 16
perianal conditions: views on etiology based on a successful treatment for hæmorrhoids, 77
peritonitis, sepsis due to: clinical, hæmodynamic and respiratory changes: management, 31
polyposis, familial, with malignant changes: histochemical distribution of hydrolytic enzymes, 34
polyps: chromosome abnormalities in, 9
–, colonic: colotomy or resection, 128
–: enlargement on X-ray examination, 43
post-operative complication, pelvic: prevention in pull-through operations for cancer and benign lesions, 121
propantheline: effect on motor activity of intestine (*by title*), 35
prostaglandins and colonic motility, 6
pruritus ani: study of 200 patients, 96
puerperium: surgery in, for painful anorectal disorders, 102

Queen Elizabeth Hospital, Adelaide: perianal suppuration at (*by title*), 114

radiation injury to bowel and rectum, 98
radiodiagnosis: in treatment of carcinoma of colon (*by title*), 42
rectal fistula and abscess: single-stage treatment (*by title*), 114
rectal neoplasms, advanced: management of intractable pain, 115
– –: associated with condylomata acuminata, 119
– –: early diagnosis – a programme of detection, 142
– –: ten-year experience with low anterior resection, 100
– –: villous tumours: technique for removal, 89
rectal prolapse and incontinence treated by reconstruction of anorectal sphincters, 94
– –: single-stage treatment (*by title*), 114
– –: sling operation for, 106
rectum, excision of: primary closure of perineal wound, 128
–: impermeability to water and electrolytes, 3
–: irradiation injury, 98
–: low anterior resection for neoplastic disease, 100
–: surgical access: transpubic approach, 81
– – –: transsphincteric exposure, 91

sepsis, due to peritonitis: clinical, hæmodynamic and respiratory changes: management, 31
serotonin: distribution in ulcerative colitis, 20
sigmoid myotomy: five-year results, 139
sigmoid neoplasms: early diagnosis – a programme of detection, 142
sigmoidoscopy: under anæsthesia, 43
sphincters, anorectal: reconstruction for rectal prolapse and incontinence, 94
–, internal anal: structure and function, 84
suppuration, perianal, at the Queen Elizabeth Hospital, Adelaide (*by title*), 114
surgery, operative: extended resection for carcinoma of splenic flexure, 136
– –: low anterior resection: transpubic approach, 81
– –: Miles resection: management of posterior wound, 104
– –: primary closure of perineal wound in excision of rectum, 128
– –: transsphincteric exposure of rectum, 91

transpubic approach for low anterior resection, 81
tuberculosis, ileocæcal: surgical management (*by title*), 145

vagotomy: influence on the colon, 7

water: absorption and secretion in colonic diseases (*by title*), 35
–: impermeability of rectum to, 3
